

BGC-3000C

ADVANCED FILTRATION TECHNOLOGY

This AquaMOR Foodservice water treatment cartridge is specifically designed for coffee and espresso applications when a more robust coffee or tea flavor is desired. A more consistent and flavorful beverage drives customer loyalty that results in reoccurring revenue and greater profitability.

The BGC-3000C cartridge slowly releases minerals into the water to improve the quality of the beverage, when a higher mineral level is needed. The BGC-3000C cartridge can be used in a multi head design for a higher level of mineral release. The cartridge will reduce chlorine, taste, odor and improve clarity. It will balance corrosive/acidic water usually produced by reverse osmosis.

Each cartridge is manufactured to the highest standard and only the best available components are used.

BGC-3000C

FILTER FEATURES

- Specifically designed for Espresso, Cappuccino, Tea and Coffee brewers
- Delivers consistent great tasting water
- For use after reverse osmosis systems to properly balance the water
- For use in any application where a higher mineral content is required

SPECIFICATIONS

Dimensions:	3.375" x 15.5" (8.1 x 39.37 cm)
Operating Pressure:	25-125 psi (1.7-8.6 bar)
Operating Temperature:	35°-100° F (1.7°-38° C)
Flow Rate:	1 gpm (3.78 lpm)
Life:	6 months*

Do not use with water that is microbiologically unsafe or of unknown quality without adequate disinfection before or after the system.

*Dependent upon incoming water conditions and usage volume.
