

BGE-1500+

ADVANCED FILTRATION TECHNOLOGY

This Aquamor Foodservice branded filter contains a 0.5 micron compressed carbon block which provides a 0.5 gpm flow rate. Certified to NSF Standard 53, this proprietary carbon block provides high capacity lead reduction and dirt-holding ability. Additionally, this filter can catalytically breakdown other impurities very similar to the way a catalytic converter works in your automobile.

These processes ensure that you are receiving the cleanest and best tasting water possible.

This patented Aquamor Foodservice filter requires NO ACTIVATION, is economical and will provide you with months of protection in any beverage or food equipment application

Certified by IAPMO R&T
against NSF/ANSI Standards
42 and 53 for the reduction of
Lead, Chlorine Taste and odor.

BGE-1500+

FILTER FEATURES

- No activation required
- Metal housing design
- Three O-ring design provides a water tight seal
- Economical alternative to expensive filter substitutes
- Delivers clean, clear water that looks and tastes great
- Injection molded cartridge liner
- IAPMO Certified to reduce Lead, Sediment, Chlorine taste and odor from your drinking water
- Designed to provide up to 2,000 gallons of life
- Does not remove minerals which may be beneficial to health
- Patent US D704,554

SPECIFICATIONS

Micron Rating	0.5 Micron
Dimensions	3.1875" x 6.5" (8.1 x 16.51 cm)
Operating Pressure	20-125 psi (1.6-8.6 bar)
Operating Temperature	35°-100° F (1.7°-38° C)
Flow Rate	0.5 gpm (1.89 lpm)
Life	2,000 gallons (7,571 liters)

Do not use with water that is microbiologically unsafe or of unknown quality without adequate disinfection before or after the system.
